# Federal Crop Insurance Summary of Business for Organic Production

---

This report provides an accounting of all insurance experience for commodities grown and insured under organic production practices (including certified and transitional acreage) beginning with the 2005 crop year. Conventional experience is provided for comparison, reflecting only those commodities and counties where organic acreage was insured under the same plan of insurance. This report reflects information reported to the Risk Management Agency (RMA) as of May 4, 2015 and includes the following:

**2014 Crop Year Experience** provides the 2014 crop year summary of organic experience by type of insurance plan, commodity (including the top 15 commodities based on 2014 organic liability), and state (including the top 10 states based on 2014 organic liability). Each table includes the corresponding conventional practice experience for the same.

**Experience by Year** provides the overall summary by year for organic, certified organic, and transitional organic, including the corresponding conventional practice experience for each.

**Experience by State** provides the overall summary by state for organic, certified organic, and transitional organic, including the corresponding conventional practice experience for each.

**Experience by Commodity** provides the overall summary by commodity for organic, certified organic, and transitional organic, including the corresponding conventional practice experience for each.

Descriptions of terminology common throughout this report are as follows:

**Organic Experience** reflects total acreage insured as transitional or certified organic production and includes the associated liability, premium, indemnity, and loss ratio (indemnity divided by premium). Policy count reflects the total number of policies where at least one acre insured was identified as transitional or certified organic (total may not reflect the sum of policies reported separately for transitional and certified as a given policy could include acreage under both designations).

**Certified Organic Experience** reflects acreage insured and identified as certified organic production and includes the associated liability, premium, indemnity, and loss ratio (indemnity divided by premium). Policy count reflects the total number of policies where at least one acre insured was identified as certified organic.

**Transitional Organic Experience** reflects acreage insured and identified as transitional organic production and includes the associated liability, premium, indemnity, and loss ratio (indemnity divided by premium). Policy count reflects the total number of policies where at least one acre insured was identified as transitional organic.

**Conventional Experience where Organic Insured** reflects conventional practice experience for those commodities and counties where transitional or certified organic acreage was insured under the same plan of insurance.

**Conventional Experience where Certified Organic Insured** reflects conventional practice experience for those commodities and counties where certified organic acreage was insured under the same plan of insurance.

**Conventional Organic Experience where Transitional Organic Insured** reflects conventional practice experience for those commodities and counties where transitional organic acreage was insured under the same plan of insurance.
